

perturbation - regulation - gene

molecular function - participation - gene

side effect - causation - compound

compound - downregulation - gene

compound - indication - disease

compound - binding - gene

compound - target - gene

compound - similarity - compound

compound - causation - side effect

compound - upregulation - gene

degree

cellular component - participation - gene

anatomy - upregulation - gene

anatomy - expression - gene

anatomy - downregulation - gene

anatomy - localization - disease

symptom - presense - disease

pathway - participation - gene

biological process - participation - gene
