

pathway - participates - gene

disease - associates - gene

disease - downregulates - gene

disease - localizes - anatomy

disease - palliates - compound

disease - presents - symptom

disease - resembles - disease

disease - treats - compound

disease - upregulates - gene

cellular component - participates - gene

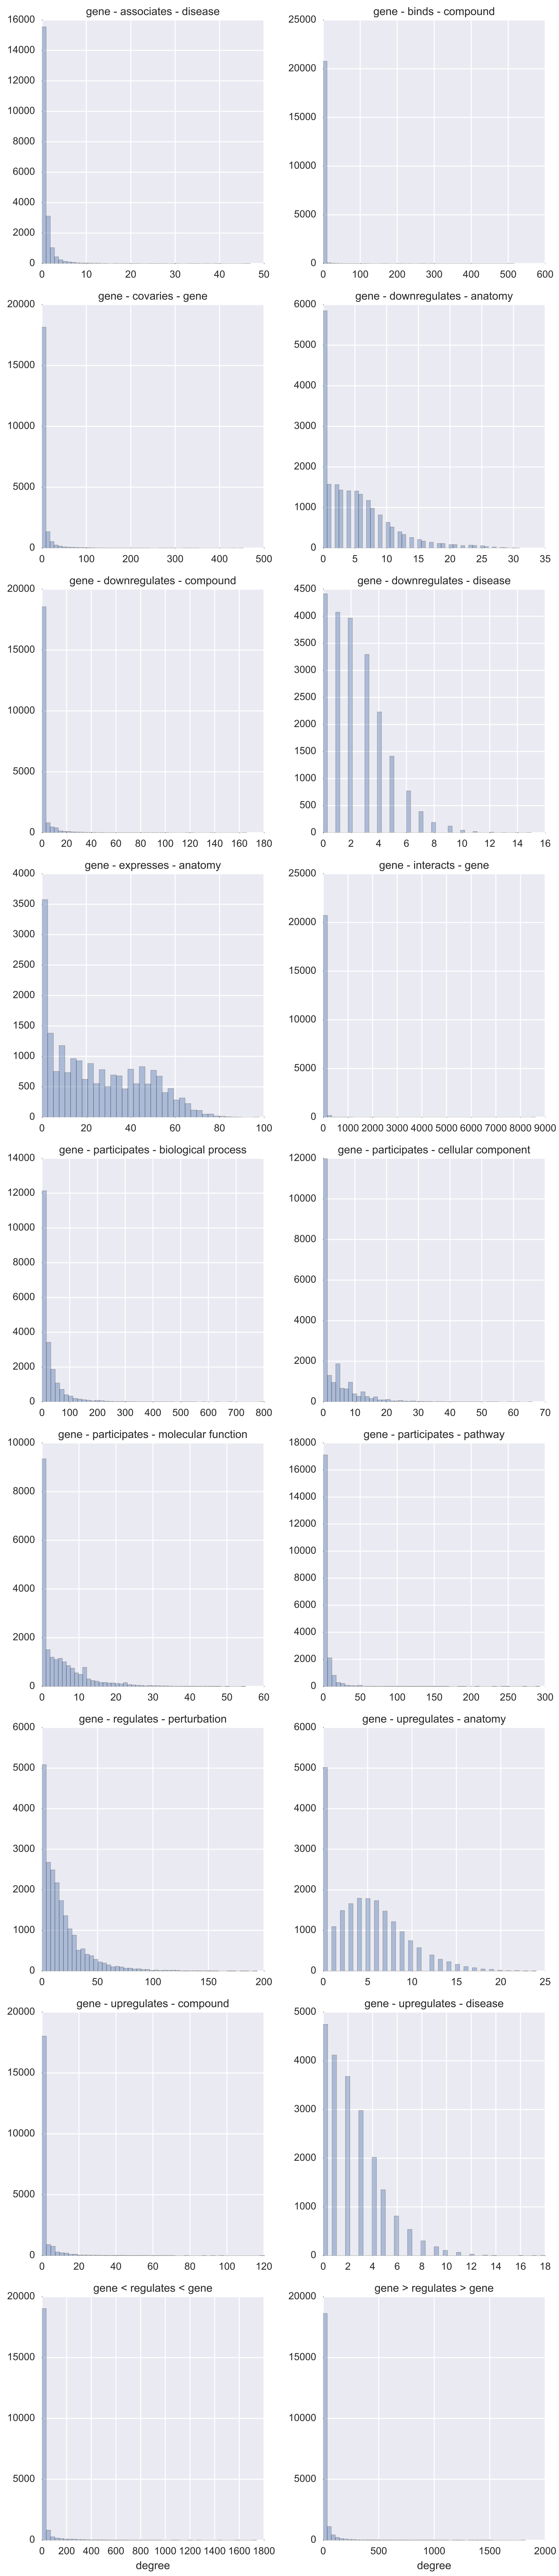

perturbation - regulates - gene

biological process - participates - gene

molecular function - participates - gene

symptom - presents - disease

side effect - causes - compound

anatomy - downregulates - gene

anatomy - expresses - gene

anatomy - localizes - disease

anatomy - upregulates - gene
